

Jorge Maikel Sierra Amaya

AI Engineer & Senior Full-Stack

Medellín, Colombia · jorgemaikelsierraamaya@gmail.com · linkedin.com/in/jorgemaikelsierra · github.com/jorge-maikel-sierra · jorge-sierra.dev/en · Site and AI agent

PROFILE

Software engineer with over 5 years building backend systems, full stack applications and AI automations. Currently AI & Automation Engineer at SOAINT, where he leads a team of 2 to 3 developers. His goal is to specialize in AI engineering, with a focus on building agents.

EXPERIENCE

AI & Automation Engineer · SOAINT

2025 — Present · Current

- I lead a team of 2 to 3 developers.
- I design and build AI automation flows in n8n, with language-model agents that replace repetitive manual processes.
- I build and maintain AI pipelines with LangChain and LangGraph that connect language models to internal tools, APIs and data sources.

Technologies: n8n · LangChain · LangGraph · LangSmith · RAG · Pinecone · Python · FastAPI

Full Stack Developer · IX Colombia

2023 — 2025

- I built administrative modules for patient management on a healthcare platform.
- I achieved 100% traceability in patient flows and cut operational errors by 20% with validations and improvements to the interface logic.
- I started on the frontend with Vue and Quasar and then moved to the backend.
- Product used by clients in Colombia, Peru and Argentina.

Technologies: React · Vue · Quasar · TypeScript · FastAPI · GraphQL · Redis · GitLab CI · Terraform

Full Stack Developer · SENA

2019 — 2023

- Backend with Python, Django and Django REST Framework, applying patterns such as Singleton and Factory.
- GCP services: Compute Engine, Cloud Functions, Cloud Run, GKE, Pub/Sub, BigQuery and App Engine.

Technologies: Python · Django · DRF · NestJS · PostgreSQL · GCP · BigQuery

PROJECTS

Paga Diario

Finished · live demo

From notebooks and Excel to a real-time collections platform.

Technologies: Node.js · Express · PostgreSQL · Prisma · BullMQ · Socket.io · Fly.io

WhatsApp chatbot with vision

Finished · technical challenge

An agent that reads purchase receipts and awards points on its own.

Technologies: n8n · WhatsApp Business · GPT-4o Vision · Docker

NetPlan

Code ready

Network planning with minimum spanning trees.

Technologies: React · Leaflet · FastAPI · NetworkX · Supabase · Docker

Pizzería Horebs

In progress

From WooCommerce to a business run on data.

Technologies: NestJS · Next.js · Supabase · Vercel · MCP · MariaDB

SKILLS

- **AI and automation:** n8n · LangChain · LangGraph · LangSmith · RAG · Pinecone · OpenAI GPT-4o Vision
- **Backend:** Node.js · NestJS · Express · Python · Django · Django REST Framework · FastAPI · AdonisJS · GraphQL · Redis · PostgreSQL · Prisma
- **Frontend:** Next.js · React · Vue · Nuxt · Quasar · TypeScript · Tailwind CSS
- **Cloud and DevOps:** GCP · AWS (certification in progress) · Docker · Fly.io · Vercel · Supabase · Terraform · GitLab CI · Jenkins · GitHub Actions

EDUCATION

- Technologist degree — SENA
- AWS Cloud Architecture — Certification in progress
- English B2 — Preparing for C1
